EDUCATION

Instituto Tecnológico de la Laguna
Bachelor of Computer Systems Engineering

Torreón, Coah.
Aug. 2021 – Present

EXPERIENCE

ERP Implementation Consultant & Project Lead
UM Mining

Jun. 2026 – Present
Torreón, Coah. (Hybrid)

- Selected to lead the end-to-end digital transformation and Odoo ERP implementation for an industrial engineering services company, owning requirements discovery, solution design, testing, planning, and stakeholder alignment across 10 core business workflows.
- Evaluated Odoo Enterprise, Bind ERP, and Microsoft Dynamics 365 Business Central through transactional testing and cost-risk analysis, driving the executive decision to adopt Odoo with Odoo.sh.
- Built validated workflows for project costing, service margins, sales-to-project traceability, and make-to-order procurement
- Leading a 14-week, seven-phase Odoo rollout for 14 licensed users, covering system architecture, projects, sales, finance, payroll, purchasing, workforce training, production deployment, and post-launch stabilization.

RPA & Automation Consultant
Project-Based — Logistics & Finance

Oct. 2025 – Jan. 2026
Monterrey, NL (Remote)

- Engineered and deployed RPA solutions for SAP Business One to automate Carta Porte shipping documents, leveraging Data Transfer Workbench (DTW) for high-volume processing of approximately 200 invoices per day and reducing end-to-end processing time by 50%.
- Developed an automated monitoring and notification system to track property tax status for large-scale real estate portfolios, providing alerts when debt status changed.

Hacking & Cybersecurity Workshop Instructor
Instituto Tecnológico de la Laguna

Sept. 2025 – Nov. 2025
Torreón, Coah.

Founder & IT Services Technician
Techcare Servicios

May 2024 – Present
Torreón, Coah.

PROJECTS

Car Dealership Management System | *Angular, TypeScript, Node.js, Express.js, Oracle Database*

- Developed a full-stack web application for managing a luxury car dealership, featuring user authentication, inventory management, and sales tracking.
- Implemented secure RESTful APIs with HTTPS and CORS, enabling reliable communication between the frontend and backend while providing real-time operational data.
