EDUCATION

Instituto Tecnológico de la Laguna
Bachelor of Computer Systems Engineering

Torreón, Coah
Aug. 2021 – Present

EXPERIENCE

Entrepreneur

May. 2024 – Present

Techcare Servicios

Torreón, Coah

- Performed hardware and software maintenance on desktop computers and laptops, ensuring reliable performance for clients.
- Demonstrated technical expertise in troubleshooting and resolving a variety of system issues, enhancing customer satisfaction and retention.

RPA & Automation Consultant

Oct. 2025 – Jan. 2026

Project-Based/Logistics & Finance

Monterrey, NL (Remote)

- SAP Workflow Automation: Engineered and deployed RPA solutions for SAP Business One to automate Carta Porte (shipping documents), leveraging Data Transfer Workbench (DTW) for high-volume processing of 200 invoices/day and reducing end-to-end processing time by 50%.
- Property Tax Monitoring System: Developed an automated monitoring and notification tool to track property tax status ("prediales") for large-scale real estate portfolios, implementing an alert system for debt status updates.
- Operational Excellence: Delivered complete technical documentation and SOPs for both systems, enabling smooth maintenance and stable unattended execution after hand-off.

Hacking & Cybersecurity Workshop – Instructor

Sept. 2025 – Nov. 2025

Instituto Tecnológico de la Laguna

Torreón, Coah.

PROJECTS

Car Dealership Management System Web | *Angular, TypeScript, NodeJS, Express, JavaScript, Oracle DB*

- Developed a full-stack web application for managing a luxury car dealership using Angular, Node.js, Express.js, and Oracle Autonomous Database, featuring user authentication, inventory management, and sales tracking.
- Implemented secure RESTful APIs with HTTPS and CORS, ensuring reliable communication between front-end and back-end, while providing real-time data insights

Ticketing WebSite – “InEvent” | *HTML, CSS, JavaScript, PHP, MySQL, PAYPAL Checkout*

- Designed and built an end-to-end ticket-sales platform (“InEvent”) with a fully responsive frontend (HTML 5, CSS Flex/Grid, Vanilla JS) and a PHP 8 + MySQL REST back-end that handles seat-map selection, standing-room events, PayPal Checkout, and guest / registered-user flows.

TECHNICAL SKILLS

Languages: Java, C++, Python, Objective-C, PHP, JavaScript, TypeScript, SQL, HTML, CSS, GDScript, Bash

Frameworks: NodeJS, Express, Angular, Bootstrap, OpenGL, XAMPP

Project Management Tools: Jira, ClickUp, Confluence, Notion

Developer Tools: Git & Github, Automation Anywhere (360), SAP Business One & SAP GUI, Data Transfer Workbench (DTW), Remote Desktop Protocol (RDP), Visual Studio Code, Apache Netbeans, CLion, SQLDeveloper

Database & DevOps: Google Firebase, Oracle SQL Developer, Azure Data Studio, SQLServer, HANA, Docker

LANGUAGES

Conversational & Technical: Spanish - Native, English - Advanced, Japanese - Beginner

COURSES & COMPETITIVE PROGRAMMING

Courses: Git & Github; JavaScript, TypeScript, HTML, CSS, Angular & Bootstrap; API RESTful Architecture workshop; DBT Workshop; Switching and Routing CISCO.

Competitions: ICPC Mexico Finals 2025; ICPC TXST Texas-México at Texas State University 2025; TecNM Coding Cup 2025; HackMty 2025 Hackathon; Hackathon Laguna Inteligente 2025; DataWeek Programming Competition at UAC 2025; TecNM Coding Cup Programming Competition 2024; ITSA Programming Contest 2024; CEMEX Hackathon at MTY 2024.
